Use Google Home to control air conditioner

Smart appliances that have been registered at the TCL Home app can be controlled
by the Google Home appliance

1. Open the Google Home app
2. Press the "+" button in the upper left corner
3. Press "Set up Device"
4. Select "Works with Google"
5. Search for "TCL Home"
6. Enter the TCL Home account and password, then the AC unit can be controller by
   Google Home.

Voice control through Android Smart TV

After you grant the TCL Home App account permission on Google Home App, and
login the Google account on Android Smart TV, you can control the AC by voice. Get
a TCL Smart TV as an example:

1. Press ⌂ on the TV remote control to display the homepage, press ▲/▼/► to select
   (settings) > Accounts & Sign in, and press OK to enter.
2. Select Add account > GOOGLE > Sign in, press OK to enter.
3. Enter your Google account and password, and then you can control the smart air conditioner
   via the TV by Voice.

Voice control commands and functions such as the following:

Function	Voice commands
Turn on air Conditioner	Turn on the TCL AC
Turn off air conditioner	Turn off the TCL AC
Adjust the temperature	Set the TCL AC temperature to 26 degree.
Switch operation mode	Set the TCL AC to cool/fan/dry/auto mode.
Adjust the fan speed	Set the TCL AC to high/low/medium speed.

Use Alexa to control air conditioner

Smart appliances that have been registered at the TCL Home app can be controlled
by the Amazon Alexa

1. Open the Amazon Alexa app
2. Press the "menu" button in the upper left corner
3. Select "Skills & Games"
4. Search for "TCL Home" on the discover page, select "TCL HOME" and select "ENABLE
   TO USE"
5. Enter the TCL Home account and password, click "Login", app is successfully linked.
6. Click "DISCOVER DEVICES" on the discover devices.
7. Find the TCL AC in the "Thermostats" then the AC unit can be controller by Alexa.
8. If you have an Alexa Echo, and login the same Alexa account, you can control the TCL AC
   by voice, commands and functions similar to Google voice control.

Notice

1. For technical update, there is maybe deviation of the actual items from what is on the manual. We express our apologies. Please refer to your actual product and APP.
2. Smart air conditioner APP can be altered without notice for quality improvement and also be deleted depending on the circumstances of manufacturing firms .
3. In case Wi-Fi signal strength is weakened, smart App may be disconnected. So make sure the indoor unit near to wireless router.
4. DHCP server function should be activated for wireless router.
5. The internet connection may fail because of a firewall problem. In this case, contact your internet service provider.
6. For smart phone system security and network setting, make sure Smart air conditioner APP is trusted.

Trouble shooting
